

IDENTIFYING CARBON REDUCTION OPPORTUNITIES

Elevate your organisation's ambition on "SDG 13 - Take urgent action to combat climate change and its impacts".

This course will uncover opportunities for GHG emissions reductions and how to develop a emission management and reduction plan.

Join this one day course to discover and learn how you can reduce emissions across a range of different functions:

- Building energy emissions
- Travel and fleet emissions
- Freight and logistics emissions
- Waste
- Procurement and purchased goods and services.

Who will benefit most from this training?

This training course is aimed at carbon and sustainability professionals with a sound knowledge of ISO 14064 Part 1:2018, who want to uncover organisational opportunities for GHG emission reductions.

Please Note:

Participants are required to have sound knowledge of carbon inventories to ISO14064, Part 1. If you do not, we recommend completing the Preparing a Carbon Inventory Training Course beforehand (being held on 24 & 25 November online).

Certification

This training prepares candidates for our Carbon Auditor Certification <https://cep.org.nz/certified-carbon-auditor/>.
NB: Accreditation fees are to be advised and not included in Training fees.
