CEP TRAINING & CERTIFICATION PATHWAY

UNDERSTANDING EMISSIONS TRAINING & CERTIFICATION		
PREPARING A CARBON INVENTORY (1.5 days) Course Link	Understand ISO 14064-1:2018, an international standard for quantification greenhouse gas (GHG) emissions.	and reporting of
IDENTIFYING CARBON REDUCTION OPPORTUNITIES (1 day) Course Link	Uncover opportunities for GHG emissions reductions from your carbon invalence of the CEP Preparing a Cacourse, or equivalent.	•
CARBON AND ENERGY PROFESSIONAL (4 days + practical plan development) Course Link	Become proficient in planning energy and emissions reductions. Utilises real energy and carbon emissions data from the participant's organisation meaning the successful completion of the course provides immediate and tangible business benefits.	CERTIFIED CARBON + ENERGY PROFESSIONAL
CARBON AUDITOR (2 days + certification online exam) Course Link	Gain the skills to undertake Greenhouse Gas (GHG) audits efficiently and effectively and prepare audit reports and opinions. Please note: This course has the pre-requisite of the CEP Preparing a Carbon Inventory course, or equivalent.	CERTIFIED CARBON AUDITOR

CARBON REDUCTION THROUGH ENE	RGY EFFICIENCY TRAINING & CERTIFICATION	
ENERGY MANAGEMENT FOR FACILITIES MANAGERS	Manage your property's energy use, improve efficiency and reduce costs.	
(2 days)		
<u>Course Link</u>		
CONTINUOUS COMMISSIONING SPECIALIST	System optimisation for those involved in the commissioning and operation of commercial buildings as HVAC engineers, installation, maintenance and	
(2.5 days + 3 hour exam)	service technicians, BMS and Controls specialists and technicians, and	ENERGY
<u>Course Link</u>	energy auditors and consultants.	MASTER CONTINUOUS COMMISSIONING
COMMERCIAL BUILDING ENERGY SPECIALIST – HVAC & Controls	Best-practice energy management, efficiency and built environment outcomes for engineers and technicians involved in the design, construction	>
(3 days + online exam and assessment)	and maintenance of commercial buildings.	ENERGY
Course Link		MASTER COMMERCIAL BUILDING
ENERGY AUDITOR	Understand the AS/NZS 3598/2014 Energy Efficiency Standard and how to	-
(2 days + accreditation assessment)	apply if to assess and improve energy performance. Covers all 3 parts: Commercial Buildings; Industrial Activities; and Transport.	
<u>Course Link</u>	Commercial Buildings, industrial Activities, and Transport.	ENERGY
		MASTER
MEASUREMENT AND VERIFICATION (CMVP)	Designed for Commercial and Industrial HVAC, Lighting and Energy Management Professionals, this training and certification will help	
(2.5 days + 4 hour exam)	provide quality outcomes in measuring and verifying energy use and	
<u>Course Link</u>	savings.	
OPTIMISING PROCESS HEAT SYSTEMS	Designed to enable the fine tuning of industrial processes to minimise energy use, cost	
(2 days)	and carbon emissions while maintaining process integrity and quality.	
<u>Course Link</u>		
ADVANCED INDUSTRIAL ENERGY SYSTEMS OPTIMISATION	Advanced skills for experienced technicians and practitioners around optimising the energy efficiency of industrial systems.	
(1 day + exam and assessment)	Please note: this course has the prerequisite of the CEP Optimising	ENERGY
<u>Course Link</u>	Process Heat Systems course, or equivalent.	MASTER INDUSTRIAL ENERGY SYSTEMS

BETTER BUSINESS FOR CARBON, ENERGY AND SUSTAINABILITY PROFFESIONALS TRAINING		
BUSINESS CASE WORKSHOP	Understand how to present the financial benefits of a project and help you get projects "over the line".	
(1 day) <u>Course Link</u>		
COMMERCIAL SKILLS DEVELOPMENT	Win, satisfy and retain clients and increase rates of proposal acceptance.	
(2 x 1 day)		
Course Link		

Please note: Course completion does not guarantee certification. CEP certifications are structured to provide quality assurance with technical competence of certification holders. Requirements for certification differ for each certification. Please see the CEP website www.cep.org.nz. 1 day training equates to 6 hours.
