

WHAT WE DO

Our purpose is to address climate change through inspiring, educating and connecting carbon, energy and sustainability professionals.

Why be CEP Certified?

- Build your personal brand with digital badges
- CEP credentials show expert level proficiency in specialist fields
- One-click verification for employees and clients
- Continuous Professional Development (CPD) requirements and Codes of Ethics and Conduct ensure maintenance of professional standards

Certification structure

CEP offers two certifications:

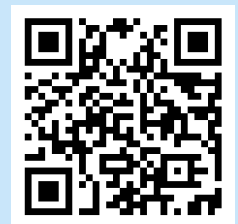

- Certified Professional in Energy (CPE)
- Certified Professional in Carbon (CPC)

The certifications are made up of 14 and 15 modules respectively plus an Experience Assessment.

Common modules lay a foundation for the Specialist modules, and then a Common Capstone module completes the learning.

The final step to CEP Certification is the Experience Assessment.

- Planning Fundamentals
- Goal Setting
- Target Setting and Monitoring
- Introduction to Systems Thinking
- Efficiency First
- Fuel Switching
- Change Management
- Preparing and Understanding Business Cases

Specialist Modules

- Energy Types, Forms, Media and Vectors
- ISO 50001
- Basic Measurement and Verification
- Energy Efficiency
- Energy Markets and Procurement

Common Capstone

- Designing an Effective Programme

14 Modules

Certified Professional in Carbon (CPC)

Common Modules

- Planning Fundamentals
- Goal Setting
- Target Setting and Monitoring
- Introduction to Systems Thinking
- Efficiency First
- Fuel Switching
- Change Management
- Preparing and Understanding Business Cases

Specialist Modules

- Understanding Emissions
- Preparing a GHG Inventory
- Low Carbon Transport
- Carbon Markets and Offsetting
- The Regulatory Environment
- Identifying and Mitigating Climate Change Risk

Common Capstone

- Designing an Effective Programme

15 Modules

Getting Certified

Modules can be held individually as each exam carries its own digital badge or attain the set for full certification. Full certification also requires a successful experience assessment.

How much will it cost?

Fees for training, exams, experience assessments and certification scheme participation will be released ahead of launch and you will be thrilled at quite how low they are. CEP members and employees of corporate partners will be entitled to generous discounts on training fees so join CEP now.

When is it coming?

Modules and exams are scheduled for launch later in 2024. You can watch the webinar about 'Becoming a Certified Professional in Carbon or Energy' cep.org.nz/education/webinars/recordings/.
