

Carbon Auditor (Auditing GHG Inventory) “Live” Classroom Training

Overview

This 2-day course provides the essential skills to efficiently and effectively conduct Greenhouse Gas (GHG) audits and prepare comprehensive audit reports and opinions.

Covering the requirements of ISO 14064-3:2019, the course equips participants with the knowledge and techniques needed to audit organisational GHG inventories with confidence.

Participants will gain hands-on experience in the full audit process, including:

- Auditing principles
- Audit team selection
- Preparing for an audit
- Audit activities and techniques
- Determining the appropriate level of review
- Preparing audit reports and opinions

The course combines audit theory with practical activities, ensuring a well-rounded learning experience.

Why should you attend?

By the end of this course, you will understand how verification strengthens GHG reporting and prevents greenwashing, master the compliance requirements of ISO 14064-3:2019 and develop the ability to apply these standards to verify organisational emissions inventories. This training will enhance your expertise in environmental auditing, supporting regulatory compliance and sustainability goals.

Who will benefit most from this training?

This course is designed for carbon professionals with a working knowledge of ISO 14064-1 who want to develop auditing skills for organisational GHG inventories.

Pre-requisite: Participants should have completed the CEP Preparing a GHG Inventory course or possess an equivalent understanding of ISO 14064-1.
