

Preparing a Greenhouse Gas (GHG) Inventory “Live” Classroom Training

Overview

This course is designed for professionals seeking to enhance their technical expertise in preparing Greenhouse Gas (GHG) inventories. The workshop provides a comprehensive overview of ISO 14064-1:2018 and practical guidance on developing inventories that align with this standard.

Content highlights:

- Preparing audit reports, opinions, boundary setting and consolidation approaches.
- Inventory development and structure.
- Identifying emission sources and classifying them under the ISO 14064-1:2018 standard.
- Meeting audit requirements for inventory verification.
- Comparing ISO 14064 and the Greenhouse Gas Protocol, highlighting key similarities and differences.
- Avoiding common pitfalls and errors, while effectively guiding your team to collect and analyse data. This supports informed decision-making and aligns with SDG 13: "Take urgent action to combat climate change and its impacts".

Who should attend?

This course is ideal for carbon and sustainability professionals, aiming to build their skills in developing organisational GHG inventories.

By attending, you will:

- Develop a thorough understanding of ISO 14064-1:2018 and its application.
- Gain practical skills for compiling accurate and verifiable GHG inventories.
- Learn strategies to identify and address common challenges in inventory development.
- Enhance your ability to support organisational climate action initiatives.

Course delivery details:

Date: 25th & 27th November 2025 (Tue & Thur)
Times: 9.30am - 2:30pm (NZST) includes breaks
CPD: 9 hours (CEP framework)
Venue: Live online
Trainer: Steve Schoultz (Toitū Envirocare)

Pricing *(NZD, per person)*

CEP Member: \$1,350.00 + GST

Non-Member: \$1,500.00 + GST

To discuss the relevance of this course for you, your business, team member, individual learning or if you require a letter of support to assist with funding approval, please contact the CEP Office by phone or email.

What attendees say

“The course was very comprehensive and gave a great introduction to preparing an audit that aligns with international standards.”

“This course is excellent for Sustainability Managers and Carbon professionals involved in the Carbon Inventory, anyone not attending this course would miss out on valuable training and content.”

“A clearly articulated course covering off the ISO 14064-1 standard and other related material, with relevant examples of current GHG inventories used and plenty of time for questions and discussion.”
